CO2 and CO4 Evaluation Finished Project Report Fall 2019-2020

Project Title: Online Polling System (Online Games)
Section: H

Student Name	Student Id
Tamanna Zaman Bristy	18-37685-1
Methila Farzana Woishe	18-37706-1
Shadhin Islam Shanto	18-37660-1
Samson P. Baidya	18-37649-1

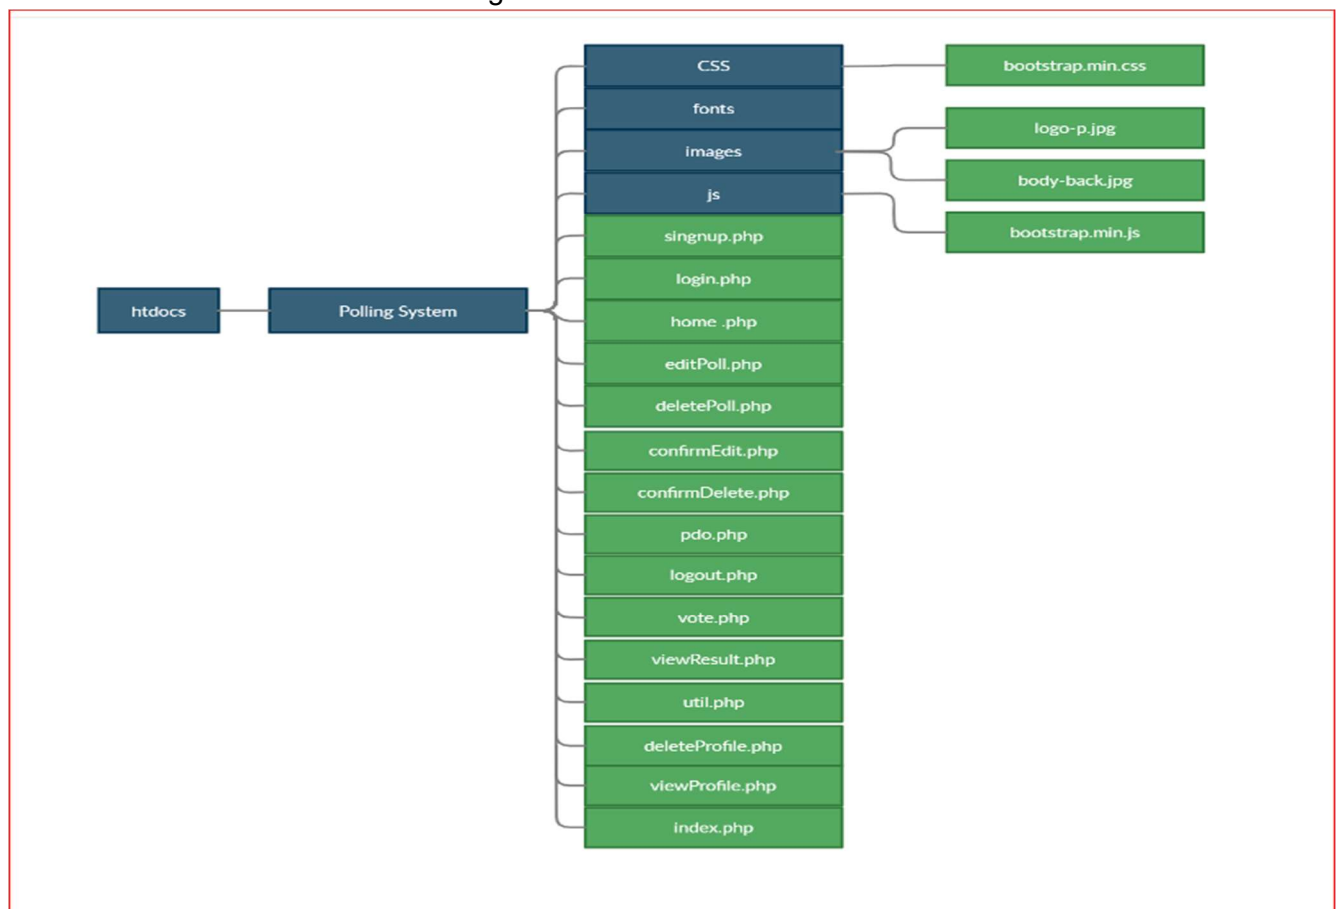

Online Polling System (Online Games)

Project Description

*Playing video **games** has become a famous habit for people of all ages, especially in this pandemic situation, children and teenagers are getting bored staying at home. Many people can buy video **games** because video **games** are not expensive or if it was **online games** it does not cost anything it is free. Playing video **games** has advantages and disadvantages. But in the current situation, it helps us to reduce our monotonous lifestyle. So this site is made for entertaining the people or game lovers and even allows them to create a poll for online games systematically. Here in our system users can signup and login. Users can create an online poll and they can also vote a poll of their interest. After All, users can view the result of all polls. Users can only edit and delete a poll that they have created on their own but they cannot delete a poll of other users. Users can view and edit their profiles. They can also delete their account permanently. At last, they can logout from their account.*

Project Folder Structure

Blue boxes indicates the folders and green boxes indicates files inside the folders.

Online Polling System (Online Games)

Core Modules of the Project

login.php

```
